EXPERIENCE

Software Engineer (AMTS-1)

February 2025 - Present

Mobius by Gaian Solutions.

Hyderabad, Telangana

• UnifiedInfra

- * Built infrastructure automation for provisioning cloud clusters with support for CPU, GPU, and TPU capacity on GCP using Kubernetes and Crossplane.
- * Developed Go-based APIs for creating fleets, managing resource demand and constraints, and scaling cluster capacity across GKE and EKS.
- * Integrated Kubernetes, Crossplane, and Karmada to automate cluster provisioning and track realized infrastructure and cluster health across environments.

• CARMA

- * Developed document ingestion and AI-powered compliance analysis workflows to evaluate organizational compliance against regulatory requirements.
- * Built document processing, compliance evaluation & dashboards with compliance scores, KRIs, insights.
- * Implemented support for 6+ regulatory frameworks, enabling continuous compliance monitoring across standards such as GDPR, HIPAA, SOC 2, and the EU AI Act.

Software Developer

August 2024 - January 2025

HealthOFin.

Remote

• FarmIT

- * Built crowdfunding platform connecting farmers with investors to fund farm loans through investments.
- * Developed role-based dashboards and secure REST APIs for Farmers, Investors, and Administrators.
- * Designed loan lifecycle management with funding tracking, repayment schedules & transaction records.

PROJECTS

Atlas | [Next.js](#), [Node.js](#), [PostgreSQL](#) + [pgvector](#), [Prisma](#), [Clerk](#), [OpenRouter](#), [Redis](#)

LIVE [↗](#)

- * Built an AI-powered RAG knowledge platform that transforms team documents and websites into a private knowledge base, enabling users to chat with their content and receive cited answers.
- * Developed a retrieval pipeline that parses, chunks, and embeds content into 1024-dimensional vectors using Jina Embeddings, indexes them in pgvector (HNSW), & streams cited responses through OpenRouter LLMs.
- * Implemented multi-tenant organizations and workspaces with 5-level role-based access, Clerk authentication, BullMQ/Redis background processing for document indexing, Backblaze B2 storage.

MemoMind | [Next.js](#), [Node.js](#), [MongoDB](#), [OpenRouter API](#), [Razorpay](#)

GITHUB [↗](#) **LIVE** [↗](#)

- * Built an AI-powered learning platform that enables users to capture notes, receive AI-generated feedback, and reinforce learning through active recall and spaced repetition.
- * Developed an intelligent learning workflow that analyzes user-written explanations using OpenRouter LLMs, identifies knowledge gaps, generates structured feedback, and creates personalized practice sessions.
- * Integrated Clerk authentication, Razorpay subscriptions, Web Push Notifications, and GitHub Actions for automated daily learning reminders.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Go.

Frontend/Backend: React.js, Next.js, TailwindCSS, Node.js, Express.js, Prisma, Redis, BullMQ, OpenRouter.

Infrastructure: Kubernetes, Crossplane, Karmada, Docker, CI/CD.

Databases: MongoDB, PostgreSQL, pgvector.

Developer Tools: Git, GitHub, VS Code, IntelliJ, Figma, GitHub Actions.

EDUCATION

Guru Ghasidas Vishwavidyalaya (Central University)

2020 - 2024.

Bachelor of Technology in Computer Science and Engineering. CGPA: 8.87.

Bilaspur, CG.
